Basis for Intervening:

Pursuant to Rules 212 and 214 of the Federal Energy Regulatory Commission's ("Commission") Rules of Practice and Procedure, 18 C.F.R. §§ 385.212 & 385.214 (2021), the ISO/RTO Council ("IRC") respectfully moves to intervene in this proceeding. The IRC is comprised of the Independent System Operators ("ISOs") and Regional Transmission Organizations ("RTOs") of North America. By sharing innovative ideas and real-world best practices, IRC members work together to build a smarter and more efficient electric grid that's well prepared to serve the North American power market and its consumers, today and tomorrow. The IRC members are subject to North American Electric Reliability Corporation ("NERC") mandatory Reliability Standards in their individual capacities, and play an important and unique role in maintaining electric reliability in North America. The IRC has a direct and vital interest in the matters addressed in this proceeding that cannot be adequately represented by any other party. Accordingly, the IRC respectfully moves to intervene in this proceeding and requests party status.
