Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(I)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly ADIT activity. However, when projected monthly ADIT activity is an increase, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity will be used.

Note 1: These depreciation and amortization rates will not change absent the appropriate filing at and approval by FERC.

Note 2: The Contribution in Aid of Construction (CIAC) made for the Hurley Substation Project is applied to offset all transmission plant categories with the remaining balance in account 356.3 for the new Smart Wire Devices for the purposes of calculating depreciation expense.

Note 3: Intangible Plant rates are not included in the JP. They are calculated straightline over the life of the asset. Ex: 3yr = 33.3% per year, 5yr = 20% per year, 10 yr = 10% per year and 15 yr = 6.67% per year. Also note the additions of Cloud Software and Fiber Optics were added after the previous JP. Again these are calculated straightline. Cloud software is 5yr = 20% per year and Fiber Optics is 20yr = 5% per year.

Notes:

A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.

B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.

C Revised formula rate calculations will be provided to support any corrections.
