Formula Rate - Non-Levelized

Rate Formula Template Utilizing FERC Form 1 Data

Rochester Gas and Electric Corporation Appendix A: Annual Transmission Revenue Requirement for Schedule 19 Projects

General Note: References to pages in this transmission formula rate rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

No All amounts shown are based on five quarter averages which are contained in footnotes to the FF1 (with the following exceptions: CWC in line 28 which is based upon one-eighth of O&M, Accumul А Deferred Income Taxes in line 24 which are a combination of beginning and end of year averages and proration amounts, and Excess Accumulated Deferred Income Taxes in line 25 which are eginning/ending year averages). в The maximum accumulated deferred tax offset to rate base is calculated in accordance with the proration formula prescribed by IRS regulation section 1.167(I)-1(h)(6) С Cash Working Capital for Schedule 19 Projects equals one-eighth (45 days) of O&M allocated to Schedule 19 Projects. D ncludes only FICA and unemployment taxes. Е Any transmission regulatory expenses allocated to Rate Schedule 19 Projects are determined after deducting any directly assigned regulatory expenses F Below are the currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that electe to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). Any Excess or Deficient Deferred Income Taxes reduce or increase income tax expense by the amount of the expense multiplied by (1/1-Γ). Inputs Required: FIT = 0.00% 0.00% (State Income Tax Rate or Composite SIT) SIT= 0.00% (percent of federal income tax deductible for state purposes) p = Include ATU for Year N with Projected ATRR for Year N+2 G Ĥ bet cost rate = long-term interest / long term debt. Preferred cost rate = preferred dividends / preferred outstanding. The ROE is determined by the New York Public Utilities Commission and capped by the ROE determined by FERC. The ROE Cap will be supported in the original filing and no change in ROE Cap may be made absent a filing with FERC. Includes revenue related to Schedule 19 Projects only, such as pole attachments, rentals and special use Includes revenue related to Schedule 19 Projects only ĸ The following acronyms are used for allocators: CP= common plant allocator (allocate common plant and common expenses to total electric) DA= DA=direct assignment (the item is direct assigned to Schedule 19 Projects) GP= gross plant allocator (allocated Schedule 19 Projects gross plant as % of electric and common plant) GPE= gross electric plant allocator (allocated Schedule 19 Projects gross plant as % of total electric gross plant) GPE= gross electric plant allocator (allocated Schedule 19 Projects gross plant as % of total electric gross plant) S19P= Schedule 19 Projects plant allocator (Schedule 19 Projects gross plant as % of total resmission gross plant) S19 W/S= Schedule 19 Projects wage and salary allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries) S19 W/S= Schedule 19 Projects wage and salary allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries) S19 W/S= Schedule 19 Projects wages and salary allocator for transmission (Schedule 19 Projects wages and salaries as a % of transmission wages and salaries) NA= not applicable (the item is not applicable to Schedule 19 Projects) TPE= transmission plant allocator (transmission plant as % of electric) T W/S= transmission wages and salaries as % of electric wages and salaries Rochester Gas and Electric wile kedude items in Account 930.2 shown on FF1 page 335 that are greater than \$1 M and not directly or indirectly related to its transmission assets. RG&E either will direct assign 0&M expense that have been tracked for the Schedule 19 Projects or allocate transmission 0&M to the Schedule 19 Projects, but not both. In accordance with the NYISO OATT, Section 14.1.5, the gross receipts tax included in Schedule 19 Projects ATRR is as follows: Μ N Gross receipt tax rate 0.00000% Estimate of Line 79 Revenue requirement Gross Receipts Tax O For future use

Instructions for Account 190:
 ADIT items related only to Schedule 19 Projects are directly assigned to Column D
 ADIT items related to Plant are included in Column E

A DOT temporate into a temporate included in Column F
 Deferred income taxes arise when items are included in taxable income in different periods than they are included in book income.
 If the item giving rise to the ADT is not included in the annual transmission revenue requirement ("ATRR"), the associated ADT amount shall be excluded.

Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(l)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity is a decrease and actual monthly ADIT activity is a decrease and actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is an increase, actual monthly ADIT activity will be used.

Note A: The above common equily, preferred stock and long-term debt amounts are not used for capital structure purposes since the CSRA requires use of the NYPSC approved capital structure.

Rochester Gas and Electric Corporation Workpaper 7: True-up Adjustment for Schedule 19 Projects Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.

The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- In accordance with its formula rate protocols, RG&E shall recalculate its Annual Transmission Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies. (i)
- Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year (ii)
- (iii) Multiply the ATRR Before Interest by (1+i)^24 months

Where:

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months) The interest rates are initially estimated and then trued-up to actual i =

To the extent possible each input to the Formula Rate used to calculate the Actual ATRR

- will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1

by the application of clearly identified and supported information. If the reconciliation is provided through a workpaper included in the filed Formula Rate Template, the inputs to the workpaper must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the

workpaper and input to the main body of the Formula Rate.

| 10 | Interest on Correction | Line 9) | | 0 |
| 11 | Sum of Corrections Plus Interest | (Line 7 + Line 10) | | 0 |

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates the same as how interest on the Annual True-up Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates the same as how interest on the Annual True-up Adjustment is computed.
- C Corrected formula rate calculations will be provided to support any corrections.
