**Re: *New York Independent System Operator, Inc.*; Notice of Delayed
Effective Date and Compliance Filing, Docket Nos. ER25-2382-00_
and ER26-2567-00_**

Dear Secretary Reese:

On May 30, 2025, the New York Independent System Operator, Inc. (“NYISO”) filed proposed revisions (“May 2025 Filing”)¹ to its Market Administration and Control Area Services Tariff (“Services Tariff”) to: (1) enhance the modeling of combined cycle gas turbine (“CCGT”) generators with duct-firing capability; and (2) expand opportunities for CCGT generators with duct-firing capability to provide Energy and Ancillary Services consistent with their physical operating capabilities. On July 25, 2025, the Federal Energy Regulatory Commission (“Commission”) issued an order accepting the NYISO’s proposed enhancements for CCGT generators with duct-firing capability (“July 2025 Order”).²

On May 18, 2026, the NYISO submitted additional proposed revisions to its Services Tariff to support the wholesale market participation opportunities for CCGT generators equipped with duct-firing capability (“May 2026 Filing”).³ The May 2026 Filing was submitted in accordance with Section 205 of the Federal Power Act and Part 35 of the Commission’s regulation and was necessary to clarify and enhance the improvements that were previously submitted to and accepted by the Commission, in the May 2025 Filing and July 2025 Order, respectively. On June 22, 2026, the Commission issued an order accepting the NYISO’s May 2026 Filing (“June 2026 Order”).⁴

¹ Docket No. ER25-2382-000, *New York Independent System Operator, Inc.*, Proposed Tariff Amendments to Enhance Wholesale Energy Market Participation by Combined Cycle Gas Turbine Generators Equipped with Duct-Firing Capability (May 30, 2025).

² *New York Indep. Sys. Operator, Inc.*, Letter Order, Docket No. ER25-2382, July 25, 2025.

³ Docket No. ER26-2567-000, *New York Independent System Operator, Inc.*, Proposed Tariff Amendments to Enhance Wholesale Energy Market Participation by Combined Cycle Gas Turbine Generators Equipped with Duct-Firing Capability (May 18, 2026).

⁴ *New York Indep. Sys. Operator, Inc.*, Letter Order, Docket No. ER26-2567, June 22, 2026.

The July 2025 Order and June 2026 Order directed the NYISO to submit a subsequent filing to provide no less than two weeks' notice of the expected effective date for the tariff revisions accepted by the Commission. On August 19, 2026, the NYISO submitted a compliance filing to provide notice of the expected effective date of September 2, 2026, for the tariff revisions accepted by the July 2025 Order and the June 2026 Order ("August 19 Notice"). The NYISO submits this filing to inform the Commission of a need to delay the effective date for such tariff revisions.⁵

I. Notice of Delayed Effective Date

In the August 19 Notice, the NYISO committed to inform the Commission if conditions arose that required a delay of the anticipated effective date.⁶ The NYISO submits this additional notice to inform the Commission that an effective date of September 2, 2026 is no longer achievable.

During its ongoing comprehensive testing and validation of the enabling software, the NYISO identified an unanticipated issue. The NYISO is expeditiously working to resolve this matter but must postpone the effective date for the accepted tariff revisions to engage in further software development and comprehensive software testing.

The NYISO expects to require approximately two weeks for the development of a resolution, further testing, and validation of the enabling software. As a result, the NYISO currently anticipates implementing the revisions to the Services Tariff accepted by the July 2025 Order and the June 2026 Order on September 16, 2026.⁷

II. Documents Submitted

The NYISO respectfully submits the following with this filing letter:

1. A clean version of the revisions to the Services Tariff accepted by the July 2025 Order with an effective date of September 16, 2026 ("Attachment I").

III. Service

The NYISO will send an electronic link to this filing to the official representative of each party to this proceeding, the official representative of each of its customers, each participant on its stakeholder committees, the New York State Public Service Commission, and the New Jersey

⁵ This compliance filing is submitted in Docket Nos. ER25-2382 and ER26-2567 to support the wholesale market participation opportunities for CCGT generators equipped with duct-firing capability as proposed and accepted in the two dockets.

⁶ August 19 Notice at 2.

⁷ Should the NYISO determine that it will be unable to implement these tariff revisions on September 16, 2026, it will promptly notify its Market Participants and the Commission.

Honorable Debbie-Anne A. Reese, Esq.

Board of Public Utilities. In addition, the NYISO will post this filing on its website at www.nyiso.com.

IV. Conclusion

The NYISO respectfully submits this filing to notify the Commission of the delayed effective date for the tariff revisions accepted by the July 2025 Order.

Respectfully submitted,

/s/ James H. Sweeney
