Submitted Electronically

Honorable Debbie-Anne A. Reese, Esq.
Secretary
Federal Energy Regulatory Commission
888 First Street N.E.
Washington, D.C. 20426

**Re: *New York Independent System Operator, Inc.*, Compliance Filing to Conform
Tariff Records; Docket No. ER27-____-000**

Dear Secretary Reese,

On August 31, 2026, the New York Independent System Operator, Inc. (“NYISO”) submitted an effective date notice informing the Federal Energy Regulatory Commission (“Commission”) that it was prepared to implement tariff rules filed in Docket No. ER25-1998-000 (“Uncertainty Reserve Requirements Docket” or “URR Docket”), which were accepted with a flexible effective date, on July 2, 2025 (“July 2025 URR Order”). The rules were made effective and implemented by the NYISO on September 16, 2026.

Also, on August 31, 2026, the NYISO submitted an effective date notice informing the Commission that it was prepared to implement tariff rules filed in Docket Nos. ER25-2382-000 and ER26-2567-000 (collectively the “Improved Duct-Firing Modeling Dockets”), which were accepted with a flexible effective date, on July 25, 2025, and June 22, 2026, respectively (collectively the “Improved Duct-Firing Orders”). The rules accepted in both dockets were made effective and implemented by the NYISO on September 16, 2026. In this letter, the NYISO refers to the three August 31, 2026, effective date notices collectively as the “August 31 Notices.”

The July 2025 URR Order and the Improved Duct-Firing Orders instructed the NYISO to submit a subsequent filing to notify the Commission regarding effective date implementation. Complying with the instruction in the Order meant that the NYISO could not submit a tariff record to accurately reflect actions the Commission took, or that the NYISO became aware of, in other dockets subsequent to the NYISO’s submission of proposed tariff revisions in the URR Docket and the Improved Duct-Firing Modeling Dockets.

The NYISO submits this eTariff Filing Code 85 (Compliance Filing—New Docket) in order to incorporate the revisions that the NYISO identified in Attachment I to its August 31 Notices into the Commission’s official eTariff record.

One of the tariff sections the NYISO submitted in the URR Docket and five of the tariff sections submitted in the initial Improved Duct-Firing Modeling Docket need to be conformed to address subsequent Commission decisions in other dockets, and the timing of the NYISO’s

implementation of those accepted tariff revisions.¹ None of the conforming changes relate to tariff revisions that were proposed for the Commission's consideration in the dockets that are the subjects of this filing. Instead, they are changes that were proposed and accepted in other proceedings between the initial filings in the above-referenced dockets and the September 16, 2026, effective date for the three sets of tariff revisions. A complete list of the tariff sections, applicable FERC filings, and filing descriptions is included with this filing as Attachment I.

The eTariff records attached to this submission contain clean revisions to Market Services Tariff Sections 2.3, 2.12, 4.2, 15.3, and 15.4 that incorporate changes that were accepted by the Commission and made effective in several intervening dockets after the NYISO submitted its URR Docket and the initial Improved Duct-Firing Modeling Docket.

This compliance filing is submitted to conform the Commission's official, electronic Tariff records with the Tariff revisions that the Commission has accepted for filing, applying the correct effective dates to all submitted revisions. Accepting this filing will improve the accuracy of the Commission's eTariff record. Because the changes identified in this filing were considered and accepted by the Commission subsequent to the submission of the tariff records in Docket Nos. ER25-1998 and ER25-2382, it is appropriate for the NYISO to submit a compliance filing to incorporate them into FERC's eTariff record.

I. Documents Submitted

The eTariff records submitted with this filing contain the conforming eTariff revisions to Market Services Tariff Sections 2.3, 2.12, 4.2, 15.3, and 15.4 described above. In addition, the NYISO submits the following documents with this filing letter for informational purposes:

1. The List of Impact Tariff Sections ("Attachment I");
2. A clean version of the conforming revisions to the Market Services Tariff Sections 2.3, 2.12, 4.2, 15.3, and 15.4 described above ("Attachment II"); and
3. A blacklined version of the conforming revisions to the Market Services Tariff Sections 2.3, 2.12, 4.2, 15.3, and 15.4 described above ("Attachment III").

¹ Market Services Tariff Section 15.4 was included in the URR Docket and also one of the five tariff sections referenced herein for the Improved Duct-Firing Modeling Dockets.

II. Service

The NYISO will send an electronic copy of this filing to the official representative of each party to this proceeding, to the New York Public Service Commission, and to the New Jersey Board of Public Utilities. In addition, a complete copy of this filing will be posted on the NYISO's website at www.nyiso.com, and the NYISO will send an electronic link to this filing to the official representative of each of its customers and to each participant on its stakeholder committees.

III. Conclusion

The New York Independent System Operator, Inc. respectfully requests that the Commission accept the attached, updated eTariff records.

Respectfully submitted,

/s/ James H. Sweeney
