SUPPORTING CALCULATIONS AND NOTES

Formula Rate - Non-Levelized

Rate Formula Template Utilizing FERC Form 1 Data

LS Power Grid New York Corporation I

For the 12 months ended 12/31/20\_\_\_

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)

References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

### Note Letter

A Balances exclude Asset Retirement Costs.

- B No Acquisition Adjustment will be recovered until a filing requesting recovery is submitted to and approved by FERC under FPA Section 205.
- C The balances in Accounts 190, 281, 282 and 283 are allocated to transmission plant included in ISO rates based on company accounting records. Accumulated deferred income tax amounts associated with asset or liability accounts excluded from rate base do not affect rate base, such as ADIT related to asset retirement obligations and certain tax-related regulatory assets or liabilities. To the extent that the normalization requirements apply to ADIT activity in the projected net revenue requirement calculation or the true-up adjustment calculation, the ADIT amounts are computed in accordance with the proration formula of Treasury regulation Section 1.167(I)-1(h)(6) with averaging in accordance with IRC Section 168(i)(9)(B). The remaining ADIT activity are averaged. Work papers supporting the ADIT calculations will be posted with each projected net revenue requirement and/or Annual True-Up and included in the annual Informational Filing submitted to the Commission
- D Investment tax credit (ITC) is recorded in accordance with the deferral method of accounting and any normalization requirements that relate to the eligibility to claim the credit or the recepture of the credit. The revenue requirement impact of any ITC amortization permitted to reduce income tax expense is determined as the amount of the Amortized Investment Tax Credit (266.8.f) multiplied by the applicable tax gross-up factor.
- E The composite income tax rate (T) applicable to each Rate Year (including both Annual Projections and True-Up Adjustments) is based on the Federal income tax rate (FIT), the State income tax rate (SIT) and the percentage of federal income tax deductible for state income tax purposes (P). If the utility is taxed in more than one state, it must attach a work paper showing the name of each state and how the blended or composite SIT was computed. Inputs Required:

0.00% (Attachment 3)

Percent of federal income tax deductible for state purposes (P) =

For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365, respectively, for a non-leap year.

- F Upon enactment of changes in tax law, ADIT balances are re-measured and adjusted in the Company's books of account, resulting in excess or deficient accumulated deferred income tax assets and liabilities. Such excess or deficient ADIT attributable to assets or liabilities reflected in ISO rates and subsequent recoverable or refundable amortization will be based upon tax records and be calculated and recorded in accordance with ASC 740 and any applicable normalization requirements of the taxing jurisdiction. For each re-measurement of deferred taxes, the amounts entered as Adjustments to Rate Base or a component of Income Taxes will be supported by work papers providing the balance for each taxing jurisdiction at the beginning and end of the year, amortization for the year and any other information required to support compliance with any applicable normalization requirements.
- G In the event that transmission assets or right of ways involve a lumpsum upfront payment under a lease that qualifies as a capital lease, it will be amortized over the life of the lease to Account 567 and the unamortized balance will be included here. In the event such a lease involves monthly or annual payments, the payments will be booked to Account 567.

Composite state income tax rate (SIT) =

- H Unfunded Reserves are customer contributed capital authorized by a regulatory agency. Balances, if any, will be supported by a workpaper.
   No amounts shall be credited to accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in a utility's rates.
- I Recovery of Regulatory Assets must be authorized by the Commission.
- J Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of Abandoned Plant.
- K Cash Working Capital assigned to transmission is transmission-allocated O&M minus the amortization of any Regulatory Asset, divided by eight. Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1.
- L Line 45 removes EPRI Annual Membership Dues listed in Form 1 at 353.f, any EPRI Lobbying expenses included in line 42 of the template and all Regulatory Commission Expenses itemized at 351.h. Line 45 removes all advertising included in Account 930.1, except safety, education or out-reach related advertising. Line 45 removes all EEI and EPRI research, development and demonstration expenses. Line 46 reflects all Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h

Line 42 or Line 44 and thus Line 48 shall include any NYISO charges other than penalties, including but not limited to administrative costs.

- M Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- 0 In accordance with the Settlement Agreement in Docket No. ER 20-716 approved [Month DD, YYYY], the Base Return on Equity shall be 9.65% and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206.

P A hypothetical capital structure of 47% debt and 53% equity will be used until the entire Marcy to New Scotland 345 kV Upgrade Project is placed in-service. After all facilities of the Marcy to New Scotland 345 kV Upgrade Project are placed in-service, the lesser of a 52% equity ratio or the actual equity ratio will be used.

NYISO Tariffs --> Open Access Transmission Tariff (OATT) --> 6 OATT Rate Schedules --> 6.10.7.2.1 OATT Schedule 10 - Formula Rate Template Q Non-incentive investments are investments without ROE incentives and incentive investments with ROE incentives

| Attachment 1 - Revenue Cre<br>LS Power Grid New York  |                        |   |
|---|------------------------|---|
| Account 454 - Rent from Electric Property (300.19.b)<br>1 Rent from FERC Form No. 1   | Notes 1 & 3            | - |
| Account 456 (including 456.1) (300.21.b and 300.22.b)<br>2 Other Electric Revenues (Note 2)<br>3 Professional Services<br>4 Revenues from Directly Assigned Transmission Facility Charges (Note 2)<br>5 Rent or Attachment Fees associated with Transmission Facilities | Notes 1 & 3            | : |
| 6 Total Revenue Credits   | Sum lines 2-5 + line 1 | - |

Note 1 All revenues booked to Account 454 that are derived from cost items classified as transmission-related will be included as a revenue credit. All revenues booked to Account 456 (includes 456.1) that are derived from cost items classified as transmission-related, and are not derived from rates under this transmission formula rate will be included as a revenue credit. Work papers will be included to properly classify revenues booked to these accounts to the transmission function. A breakdown of all Account 454 revenues by subaccount will be provided below, and will be used to derive the proper calculation of revenue credits. A breakdown of all Account 456 revenues by subaccount and customer will be provided and tabulated below, and will be used to develop the proper calculation of revenue credits.

Note 2 If the facilities associated with the revenues are not included in the formula, the revenue is shown below, but not included in the total above.

Note 3 All Account 454, 456, and 456.1 Revenues must be itemized below and tie to FERC Form No. 1 cites set forth below

| 1          | All unfunded reserves will be listed above, specifically including (but not lin | nited to) all subaccounts for FEF | RC Account Nos. 228. | 1 through 228.4. "Unfunded  | reserve" is defined as an | n accrued balance (1) c | reated and increased   |

debiting an expense which is included in this formula rate (column (e), using the same allocator in column (g) as used in the formula to allocate the amounts in the corresponding expense account) (2) in advance of an anticipated expenditure related to that expense (3) that is not deposited in a restricted account (e.g., set aside in an escrow account, see column (d)) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruals collected from customers, only the balance funded by customer collections shall serve as a rate base credit, see column (f). The source of monthly balance data is company records.

| 206         | Weighting<br>SIT=Composite State Income Tax Rate |              |                                   |   |          |         |         |         |         | 0               |

SIT will include multiple state or local income tax rates, if applicable, weighted based on the apportionment methodologies of each jurisdiction and the number of days in the year that the rates are effective.

207 The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Appendix A that are not the result of a timing difference. If any, a workpaper showing the calculation will be attache

Notes

A Long Term debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112, lines 18.c to 21.c, in the Form No. 1; the cost is calculated by dividing line 222 by the Long Term Debt balance on line 229.

B Preferred Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 line 3.c in the Form No. 1

C Common Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on Form 1 page 112 line 16.c less lines 3.c , 12.c, and 15.c

D Long-term interest will exclude any short-term interest included in FERC Account 430, Interest on Debt to Associated Companies

Notes
1. From Attachment 4, Column (q) for the period being trued-up
2. The "revenue received" is the total amount of revenue distributed in the True-Up Year. The amounts do not include any true-ups or prior period
adjustments and reflects any Competitive Bid Concessions
3. Then Monthly Interest Rate shall be equal to the interest rate set forth below on line 13 and be applied to the amount in Column E for a period of 24 months
4. The True-Up Adjustment is applied to each project prorata based its contribution to the Revenue Requirement shown in Attachment 4

| 7    | Test period days after rates become effe | ctive |   |
|      |  |       |   |

Note 1 - The computations on this workpaper average the projected annual activity of accumulated deferred income taxes. To the extent that the ADIT is subject to the normalization requirements, the protation rules of Treasury Regulation Sec. 1.167(I)-1(h)(6) and the consistency rules of IRC Section 168(i)(9)(B) are applied. Activity related to the portions of the account balances not subject to the protation requirement are averaged instead of prorated.

9 Note 2 - The components of the accumulated deferred income tax balances are detailed on Attachment 6b.

8

## 6

8

Rate year = Test period days after rates become effective

Note 1 - The computations on this workpaper average the actual annual activity of accumulated deferred income taxes. To the extent that the ADIT i subject to the normalization requirements, the proration rules of Treasury Regulation Sec. 1.167(1)-(1)(6)(6) and the consistency rules of IRC Section 1660(1)(6)(8) are applied. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated

9 Note 2 - The components of the accumulated deferred income tax balances are detailed on Attachment 6d.

142 Note 7 - Column J is the difference between actual monthly and projected monthly activity (Column I minus Column C). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-project activity.) It projected and actual activity are both positive, a negative in Column J represents over-project activity. It projected activity are both negative, a negative in Column J represents under-projection (i.e., the access of actual activity over projected activity). If projected activity are both negative, a negative in Column J represents under-projection (i.e., the access of actual activity are projected activity) and a positive in Column J represents over-projection (i.e., the amount of projected activity that did not occur).

Note 8 - Column K preserves the effects of ADIT proration from the projected revenue requirement when actual monthly and projected monthly activity 143 are either both increases or decreases. Specifically, if Column J indicates that ADIT activity was over-projected, enter Column G x [Column I / Column C]. If Column J indicates that ADIT activity was under-projected, enter the amount from Column G and complete Column L). In other situations, enter

Note 9 - Column L applies when (1) Column J indicates that ADIT activity was under-projected AND (2) actual monthly and projected monthly activit are either both increases or both decreases. Enter 50 percent of the amount from Column J. In other situations, enter zero. The ADIT activity in column L is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity. 144

Note 10 - Column M applies when (1) projected monthly activity was an increase while actual monthly activity was a decrease OR (2) projecte monthly activity was a decrease while actual monthly activity was an increase. Enter 50 percent of the amount of actual monthly activity (Col I). In other situations, enter zero. The ADT activity in column Ms multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity. 145

146 Note 11 - Column N is computed by adding the prorated monthly ADIT activity, if any, from Column K to the portion of monthly ADIT activity, if any from Column L or M to the balance at the end of the prior month.

Notes

A \* Taken directly from affiliate Cross Texas Transmission, LLC as approved by the Public Utility Commission of Texas in Docket No. 43950.

\*\* Based on a proxy depreciation rate as supported in Section 205 filing.

B These depreciation rates shall stay in effect until changed pursuant to a Commission order emanating from

an FPA Section 205 or Section 206 filing.

C In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-9 above and the weighted average depreciation rate will be used to amortize the CIAC. The life of a facility subject to a CIAC will be equivalent to the depreciation rate calculated above, i.e., 100% ÷ deprecation rate = life in years. The estimated life of the facility or rights associated with the facility will not change over the life of a CIAC without prior FERC approval.
