Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the protation requirements of Treasury Regulation Section 1.167(i)-1(h)(6). Note B: From Worksheet 2d-Prior Year ADIT Protation Actual

Exhibit RG&E-003 ADIT Proration Actual Page 9 of 16

Note A: The calculations of ADIT amounts resulting from liberatized depreciations are performed in accordance with the protation requirements of Treasury Regulation Section 1.167(I)-(Ih)(6). Differences attributate to user-projection of ADIT in the annual projection will result in a proportionate revenal of the projected protated ADIT activity to the extent of the over-projection. Differences attributate to user-projection of ADIT in the annual projection will result in a approximate to the project approximate ADIT activity to the extent of the project approximate ADIT activity to the extent of the project approximate of the project approximate ADIT activity is a difference battween the project approximate ADIT activity and the actual monthly activity, However, when projected monthly ADIT activity is a discusse, actual monthly ADIT activity as developed and the ADIT activity and the used. Likewise, when projected monthly ADIT activity is a discusse and actual monthly ADIT activity is advected.

True-up Adjustment

Page 14 of 16

Rochester Gas and Electric Corporation Workpaper 7: True-up Adjustment for Schedule 19 Projects Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- In accordance with its formula rate protocols, RG&E shall recalculate its Annual Transmission (i) Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies.
- (ii) Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year
- Multiply the ATRR Before Interest by (1+i)^24 months (iii)

Where

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months) The interest rates are initially estimated and then trued-up to actual

- To the extent possible each input to the Formula Rate used to calculate the Actual ATRR
- will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1

i =

- by the application of clearly identified and supported information. If the reconciliation is provided through a worksheet included in the filed Formula Rate Template, the inputs to the worksheet must meet this

transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the worksheet and input to the main body of the Formula Rate.

398	Miscellaneous Equipment	6.25%

Note 1: The above depreciation rates cannot change absent Commission authorization

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates the same as how interest on the Annual Trueup Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates the same as how interest on the Annual True-up Adjustment is computed.
