Attachment 1

Schedule 1

Calculation of RR

14.1.9.2 The RR component shall equal the (a) Historical Transmission Revenue Requirement plus (b) the Forecasted Transmission Revenue Requirement plus (c) the Annual True-Up, determined in accordance with the formula below.

Year

Historical Transmission Revenue Requirement (Historical TRR)

Line No.

14.1.9.2 (a)	Historical TRR shall equal the sum of NMPC's (A) Return and Associated Income Tax	es, (B) Transmissio	on Related Depreciati	on Expense, (C) Transmission Related
	Real Estate Tax Expense, (D) Transmission Related Amortization of Investment Tax (Credits, (E) Transm	ission Operation and	Maintenance Expense,
	(F) Transmission Related Administrative and General Expenses, (G) Transmission Re	ated Payroll Tax E	xpense, (H) Amortiza	tion of Transmission Regulatory Assets
	and Liabilities, (I) Billing Adjustments, and (J) Transmission Related Bad Debt Expens	e less (K) Revenue	e Credits, (L) Transmis	ssion Rents,
	and (M) Project Specific Revenue Requirement Credits, all determined for the most	recently ended ca	lendar year as of the	beginning of the update year.

Attachment 1 Schedule 10

	Definition
14.1.9.2.I.	Billing Adjustments shall be any adjustments made in accordance with Section 14.1.9.4.4 below. () indicates a refund or a reduction to the revenue requirement on Schedule 1.
14.1.9.2.J.	Transmission Related Bad Debt Expense shall equal Bad Debt Expense as reported in Account 904 related to NMPC's wholesale transmission billing.
14.1.9.2.K.	Revenue Credits shall equal all Transmission revenue recorded in FERC account 456 excluding (a) any NMPC revenues already reflected in the WR, CRR, SR, ECR and Reserved components in Attachment H of the NYISO TSC rate; (b) any revenues associated with expenses that have been excluded from NMPC's revenue requirement; (c) any revenues associated with transmission service provided under this TSC rate, for which the load is reflected in the calculation of BU, and (d) any revenues associated with Schedule 15a transmission projects not charged under this TSC rate.
14.1.9.2.L.	Transmission Rents shall equal all Transmission-related rental income recorded in FERC account 454.615
14.1.9.2.M.	Project Specific Revenue Requirement Credit shall equal the Base Revenue Requirement associated

- 14.1.9.4(d)
 - 1 Any changes to the Data Inputs for an Annual Update, including but not limited to revisions resulting from any FERC proceeding to consider the Annual Update, or as a result of the procedures set forth herein, shall take effect as of the beginning of the Update Year and the impact of such changes shall be incorporated into the charges produced by the Formula Rate (with interest determined in accordance with 18 C.F.R. § 38.19(a)) in the Annual Update for the next effective Update Year. This mechanism shall apply in lieu of mid-Update Year adjustments and any refunds or surcharges, except that, if an error in a Data Input is discovered and agreed upon within the Review Period, the impact of such change shall be incorporated prospectively into the charges produced by the Formula Rate during the remainder of the year preceding the next effective Update Year, in which case the impact reflected in subsequent charges shall be reduced accordingly.

with transmission projects not charged under this TSC rate.

2 The impact of an error affecting a Data Input on charges collected during the Formula Rate during the five (5) years prior to the Update Year in which the error

36

Billing Units - MWH

Attachment H, Section 14.1.9.6

BU shall be the total Niagara Mohawk load as reported to the NYISO for the calendar billing year prior to the Forecast Period, including the load for customers taking service under Niagara Mohawk's TSC Rate. The total Niagara Mohawk load will be adjusted to exclude (i) load associated with wholesale transactions being revenue credited through the WR, CRR, SR, ECR and Reserved components of Workpaper H of the NYISO TSC rate including Niagara Mohawk's external sales, load associated with grandfathered OATT agreements, and any load related to pre-OATT grandfathered agreements; (ii) load associated with transactions being revenue credited under Historical TRR Component J; and (iii) load associated with netted station service.

Notes:

- (a) The affected ADIT accounts were remeasured by comparing ADIT on cumulative temporary differences for each item in accounts 190, 282, and 283 at the current Federal, State & Local Income Tax rate to ADIT balances at historical Federal, State & Local Income Tax rates. The difference between the two represents the excess or deficient ADIT. Refer to Schedule 14(a).
- (b) Relates to the Federal Income Tax Rate change associated with the 2017 Tax Cuts and Jobs Act.
- (c) Niagara Mohawk Power Corporation may add or remove sublines and notes explaining them without a FPA Section 205 filling.

Shading denotes an input

Line No.	Description	Amount	Source	Definitions
1	Project Gross Plant In-Service	-	Workpaper _	Project Gross Plant In-Service will be the total capital investment for the project included in Transmission Plant In Service plus an allocation of Transmission allocated General, Common and Intangible Plant based on the ratio of project specific transmission plant to Transmission Plant.
2	CWIP	-	Workpaper _	Authorized by FERC Order Project-related depreciation and amortization reserve shall equal the accumulated credit of
3	Project - Related Depreciation and Amortization Reserves (Enter Credit)	-	Workpaper _	Project - Related Depreciation Expense net of any applicable retirements, cost of removal or salvage adjustments associated with the project. Project - Related Accumulated Deferred Income Taxes shall equal ADIT calculated based on cost, accumulated book depreciation and accumulated tax depreciation.
4	Project - Related Accumulated Deferred Income Taxes (Enter Credit)	-	Workpaper _	
5	Project - Related (Excess) Deficient ADIT	-	Schedule 15c _ Line 2Q	Project - Related (Excess) Deficient ADIT shall be the unamortized excess or deficient ADIT balance related specifically to the project as per Schedule 15c.
6	Project - Related Prepayments	#DIV/0!	(Line 1/ Schedule 5 Line 13) * Schedule 7 Line 15 Column (5)	Project - Related Prepayments shall equal the ratio of Project Gross Plant In-Service to Gross Transmission Investments times Transmission Related Prepayments
7	Project - Related Materials & Supplies	#DIV/0!	(Line 1/ Schedule 5 Line 13) * Schedule 7 Line 21 Column (5)	Project - Related Materials & Supplies shall equal the ratio of Project Gross Plant In-Service to Gross Transmission Investments times Transmission Related Materials & Supplies
8	Project - Related Cash Working Capital	#DIV/0!	(Line 1/ Schedule 5 Line 13) * Schedule 7 Line 28 Column (5)	Project - Related Cash Working Capital shall equal the ratio of Project Gross Plant In-Service to Gross Transmission Investments times Transmission Related Cash Working Capital
9	Net Investment Base	#DIV/0!	Sum lines 1 through 8	
10	Project Specific Investment Base excl CWIP Return and Asso. Taxes	#DIV/0!	Schedule 15b Line 24	
11	Project - Related Depreciation Expense	_	Workpaper _	Project-related depreciation expense will be determined based on application of the current FERC approved depreciation accrual rates per Section 14.1.9.1.14 of Attachment H of the NYISO OATT on a utility account basis to the Project Gross Plant In-service. Project - Related Amortization of (Excess) Deficient ADIT shall be the annual amortized
12	Project - Related Amortization of (Excess) Deficient ADIT	-	Schedule 15c _ Line 2J	excess or deficient ADIT balance related specifically to the project as identified in Schedule 15c Project Specific (Excess) Deficient ADIT. Project related portion of Transmission Related Real Estate Tax Expense as determined
13	Project - Related Real Estate Taxes	-	Workpaper _	based on the taxable value of the investment and the applicable property tax rate.

14	Project - Related Operation & Maintenance Expense	_	Workpaper _	Project - Related Operation and Maintenance Expense shall be based on charges to project-specific work orders. Operation & maintenance costs that cannot be directly attributed to a project will be allocated to a project based on the ratio of the Project Gross Plant In-service to Gross Transmission Investments.
15	Project Allocated Administrative & General Expense	#DIV/0!	(Line 1/ Schedule 5 Line 13) * (Schedule 9 Line 38 Column (5) + Schedule 9 Line 44 Column (5))	Project Allocated Administrative and General Expense shall equal the ratio of Project Gross Plant In-Service to Gross Transmission Investment times the sum of Transmission Related Administrative and General Expenses and Transmission Related Payroll Tax Expense.
16	Billing Adjustments	-	_ Workpaper _	Billing Adjustments shall be any adjustments made in accordance with Section 14.1.9.4.4
17	Base Revenue Requirement	#DIV/0!	Sum lines 10 through 16	
18	Project Specific Investment Base CWIP Return and Asso. Taxes	#DIV/0!	Schedule 15b Line 25	Project Specific Investment Base CWIP Return and Associated Taxes shall be the Return and Associated Income Taxes related to authorized CWIP included in ratebase
19	Cost Containment Adjustment	-	Schedule 15e Line 23	Authorized by FERC Order
20	Billing Adjustments	-	Workpaper _	Billing Adjustments shall be any adjustments made in accordance with Section 14.1.9.4.4

2	Total (Sum Lines1a thru 1 []) (c)			_	·				_	-			

Notes:

- The affected ADIT accounts were remeasured by comparing Project Specific ADIT on cumulative temporary differences for each item in accounts 190, 282, and 283 at the current Federal, State & Local Income Tax rate to Project Specific ADIT balances at historical Federal, State & Local Income Tax rates. The difference between the two represents the excess or deficient ADIT recorded to Account 254 or Account 182.3, respectively. Amounts reflected on this schedule are a subset of total Transmission Related (Excess) Deficient ADIT to FF1 Page 232 for Account 182.3 and FF1 Page 278 for Account 254
- b) Niagara Mohawk Power Corporation may add or remove sublines and notes explaining them without a FPA Section 205 filing.
- (c) Total equals the sum of sublines a through [], where [] is the last subline denoted by a letter.
- (d) Enter credit balances as negatives.
- (e) Deficient/(excess) ADIT balances will be amortized as follows: "Protected property-related" = ARAM, "unprotected property-related" = 31 yrs, all other unprotected deficient/(excess) ADIT balances = 10 yrs.
- (f) Deficient ADIT is amortized to Account 410.1; Excess ADIT is amortized to Account 411.1.
- (g) Other changes to (excess)/deficient ADIT due to the conclusion of IRS audits during applicable periods affected by a change in federal, state or local tax rates, the establishment of new (excess)/deficient ADIT due to future tax rate changes and classification changes between protected and unprotected categories due to the passage of time.
- (h) Tax gross up calculated using the Composite Tax Rate / (1 Composite Tax Rate) in effect for the applicable period.
- (i) Niagara Mohawk Power Company will add footnotes below to identify excess or deficient ADIT from future Federal, State and Local income tax rate changes.
- (j) []

- Niagara Mohawk Power Company may add footnotes below without a FPA Section 205 filing. (e)

Under the cost containment mechanism for the Smart Path Connect ("SPC") project ("SPC") project" or "Project"), where "Eligible Project Costs" exceed the "Cost Cap," NMPC will earn no ROE on 20% of the equity portion of the actual costs that exceed the Cost Cap. NMPC will remain eligible to recover the depreciation and debt costs on its share of all actual Project-related costs.

The Cost Cap for the SPC Project is \$481.8 million.

Eligible Project Costs are defined as all capital costs incurred to develop, construct, and place the SPC Project into service, excluding "Third Party Costs" and "Unforeseeable Costs" in excess of 2.5% of the Cost Cap.

Third Party Costs include: (i) interconnection and network upgrade costs resulting from the ISO evaluation process; (ii) property taxes; and (iii) any increased costs, i.e., costs incurred related to the rescheduling of outages or to the relocation of utility assets, which are beyond the ability of NMPC to control or mitigate.

Unforeseeable Costs are defined in terms of costs that NMPC could not have reasonably anticipated at the time the estimate was submitted to the NYPSC as part of the Article VII application process.-Unforeseeable Costs include the following:

- <u>UC 1</u> Costs associated with material modifications to the routing or scope of work of the Project that results from a NYPSC order, negotiation, or settlement agreement within the siting process, or are imposed or required by any other governmental agency. For the avoidance of doubt, foreseeable obligations, as included in NMPC's Article VII Application to the New York Public Service Commission for the SPC Project, or non-material obligations imposed upon NMPC as a normal part of the siting process, shall not be deemed to be Unforeseeable Costs
- UC 2 Costs associated with changes in applicable laws and regulations, or interpretations thereof by governmental agencies
- UC 3 Costs incurred as a result of orders of courts or action, or inaction, by governmental agencies;
- <u>UC 4</u> Costs related to destruction, damage, interruption, suspension, or interference of or with the Project caused by landslides, lightning, earthquakes, hurricanes, tornadoes, severe weather, fires, explosions, floods, epidemics, pandemics, acts of public enemy, acts of terrorism, wars, blockades, riots, rebellions, sabotage, insurrections, environmental contamination or damage, or strike or otherwise unavailability of skilled labor, provided that (i) the cause was not reasonably within the control of NMPC, (ii) NMPC made reasonable efforts to avoid or minimize the adverse impacts of any of the above-listed events, and (iii) NMPC took reasonable steps to expeditiously resolve the event after it occurred;
- UC 5 Steel cost escalation that is greater than the "Handy Whitman Construction Cost Index" applied to steel costs in determining the Cost Cap; and
- UC 6 Total actual Project cost escalation, excluding steel costs, that are greater than 150% of the Handy Whitman Construction Cost Index applied to non-steel costs in determining the Cost Cap.
