Section 6.19.9.2.2 Formula Rate Template

Central Hudson Gas and Electric Corporation Transmission Formula Rate Schedule 19 Projects Projected ATRR or Actual ATRR for the 12 Months Ended 12/31/XXXX Index

Workpaper	Tab	Description
А	Appendix A	Annual Transmission Revenue Requirement for Schedule 19 Projects
1	RB Items	Average Balances for Most Rate Base Items
2a	ADIT-Current Year	Current Year Average Accumulated Deferred Income Taxes
2b	ADIT-Prior Year	Prior Year Accumulated Deferred Income Taxes
2c	ADIT Proration Projected	Proration of Projected Accumulated Deferred Income Taxes
2d	ADIT Proration Actual	Proration of Actual Accumulated Deferred Income Taxes
3	EADIT	Excess Accumulated Deferred Income Tax Rate Base and Amortization
4	IT Permanent Differences	Permanent Book/Tax Differences
5	Project Return	Return Requirement by Project
6	Project Cost Of Capital	Schedule 19 Projects Cost of Capital
7	Annual True-up Adjustment	Annual True-up Adjustment
8	Depreciation Rates	Depreciation Rates Approved by the Commission and Used to Determine Schedule 19 Projects Depreciation and Amortization Expense
9	Corrections	Prior Period Corrections

Formula Rate - Non-Levelized

Notes	3				

A All amounts shown are based on 13 month averages which monthly numbers are contained in footnotes to the FF1 (with the following exceptions: CWC in line 28, which is based upon one-eighth O&M, and Accumulated Deferred Income Taxes in line 24 and Excess Accumulated Deferred Income Taxes in line 25, which are beginning/ending year averages or prorated amounts). B The maximum accumulated deferred tax offset to rate base is calculated in accordance with the proration formula prescribed by IRS regulation section 1.167(l)-1(h)(6).

C Cash Working Capital for Schedule 19 Projects equals one-eighth (45 days) of O&M allocated to Schedule 19 Projects.

D Includes only FICA and unemployment taxes.

E Any transmission regulatory expenses allocated to Schedule 19 Projects are determined after deducting any directly assigned regulatory expenses.

F Below are the currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). Any Excess or Deficient Deferred Income Taxes reduce or increase income tax expense by the amount of the expense multiplied by (1/1-T).

	Inputs Required:	FIT =	0.00%
		SIT=	0.00% (State Income Tax Rate or Composite SIT)
		p =	0.00% (percent of federal income tax deductible for state purposes)
G	Include ATU for Year N with Projected ATF		
			referred outstanding. The ROE is determined by the New York Public Utilities Commission and capped by the
		will be supported in the original filing and no change in	
	NOE determined by I ENC. The NOE dap	will be supported in the original hing and no change in	NOL Cap may be made absent a ming with LNO.
		rojects only, such as pole attachments, rentals and spe	cial use.
	Includes revenue related to Schedule 19 P		
K	The following acronyms are used for alloca		
		CP= common plant allocator (allocate com	nmon plant and common expenses to total electric)
		DA= direct assignment (the item is direct a	assigned to Schedule 19 Projects)
		GP= gross plant allocator (allocated Scher	dule 19 Projects gross plant as % of electric and common plant)
		GPE= gross electric plant allocator (allocate	ed Schedule 19 Projects gross plant as % of total electric gross plant)
		S19P= Schedule 19 Projects plant allocator	(Schedule 19 Projects gross plant as % of total transmission gross plant)
		S19 W/S= Schedule 19 Projects wage and sala	ry allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries)
		Schedule 19 Projects wages and sal	ary allocator for transmission (Schedule 19 Projects wages and salaries as a % of transmission wages and
		S19 W/ST salaries)	
		NA= not applicable (the item is not applica	able to Schedule 19 Projects)
		TPE= transmission plant allocator (transmis	ssion plant as % of electric
		T W/S= transmission wages and salaries as	% of electric wages and salaries
L	Central Hudson will exclude items in Accou		\$1 M and not directly or indirectly related to the provision of transmission services.
			Projects or allocate transmission O&M to the Schedule 19 Projects, but not both.

Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(I)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used.

Central Hudson Gas and Electric Corporation Workpaper 7: Annual True-up Adjustment

Projected ATRR or Actual ATRR for the 12 Months Ended 12/31/XXXX

Debit amounts are shown as positive and credit amounts are shown as negative. The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- In accordance with its formula rate protocols, Central Hudson shall recalculate its Annual Transmission Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies. (i)
- Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year (ii)
- (iii) Multiply the ATRR Before Interest by (1+i)^24 months

Where:

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months) The interest rates are initially estimated and then trued-up to actual

To the extent possible each input to the Formula Rate used to calculate the Actual ATRR

i =

To the extent possible each input to the FORFOrm No. 1 or will be taken to calculate the Actual ATRK will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1 by the application of clearly identified and supported information. If the reconciliation is provided through a worksheet included in the filed Formula Rate Template, the inputs to the worksheet must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the worksheet and input to the main body of the Formula Rate.

Line

2

- ATRR based on actual costs included for the previous calendar year evenues based upon the Projected ATRR for the previous calendar year and excluding any true-up adjustment в Difference (A-B)
- 3 С Future Value Factor (1+i)^24 4 D
- 5 E
 - True-up Adjustment (C*D) Interest Rate True-up (Note 1)

Where:

i = average interest rate as calculated below

INTANGIBLE PLANT	Note 3	
303 303 303 303 303 303 303 303	3 Yr 5 Yr 10 Year 15 year Cloud Software Fiber Optics Transmission Facility Contributions in Aid of Construction	33.33% 20.00% 10.00% 6.67% 20.00% 5.00% Note 2

Note 1: These depreciation and amortization rates will not change absent the appropriate filing at and approval by FERC.

Note 2: The Contribution in Aid of Construction (CIAC) made for the Hurley Substation Project is applied to offset all transmission plant categories with the remaining balance in account 356.3 for the new Smart Wire Devices for the purposes of calculating depreciation expense.

Note 3: Intangible Plant rates are not included in the JP. They are calculated straightline over the life of the asset. Ex: 3yr = 33.3% per year, 5yr = 20% per year, 10 yr = 10% per year and 15 yr = 6.67% per year. Also note the additions of Cloud Software and Fiber Optics were added after the previous JP. Again these are calculated straightline. Cloud software is 5yr = 20% per year and Fiber Optics is 20yr = 5% per year.

Central Hudson Gas and Electric Corporation Workpaper 9: Prior Period Corrections Projected ATRR or Actual ATRR for the 12 Months Ended 12/31/XXXX

11	Interest on Correction Sum of Corrections Plus Interest	Line 9) (Line 7 + Line 10)		0 0

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates the same as how interest on the Annual Trueup Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates the same as how interest on the Annual True-up Adjustment is computed.
- C Revised formula rate calculations will be provided to support any corrections.
