DIRECT TESTIMONY OF
APRIL THEBERGE AND ANGELA BASSANO

I. INTRODUCTION AND EXPERIENCE

Q. MS. THEBERGE, PLEASE STATE YOUR POSITION AND BUSINESS ADDRESS.

A. I am the Vice President of Accounting and Process for Avangrid. My business address is One City Center, 5th Floor, Portland, Maine, 04101.

Q. WHAT ARE YOUR RESPONSIBILITIES IN THIS POSITION?

A. I am responsible for overseeing accounting processes, including the monthly close of the books and administration of the SAP accounting system for the Avangrid companies, including New York State Electric & Gas Corporation (“NYSEG”) and Rochester Gas and Electric Corporation (“RG&E”) (collectively, “Applicants”).

Q. PLEASE SUMMARIZE YOUR WORK EXPERIENCE AND EDUCATIONAL BACKGROUND.

A. I graduated from the University of Maine with a Bachelor of Science in Accounting, and I earned a Master of Business Administration from the University of Southern Maine. I have over 16 years of experience accounting for regulated utilities in various positions of increasing responsibility. Prior to assuming my current position in 2023, I served as the Director of Centralized Accounting for Avangrid Management Company.

Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE FERC?

A. No, I have not previously testified before the Federal Energy Regulatory Commission (“FERC” or “Commission”). I have testified before the state commission in Connecticut for both electric and gas rate proceedings.

Q. MS. BASSANO, PLEASE STATE YOUR POSITION AND BUSINESS ADDRESS.

A. I am the Senior Director of Business Performance in the Energy Strategy, Policy & Transformation team for the Avangrid Networks companies, including NYSEG and RG&E. My business address is 100 Marsh Hill Road, Orange, Connecticut, 06477.

Q. WHAT ARE YOUR RESPONSIBILITIES IN THIS POSITION?

A. I am responsible for the business performance and support for the Energy Strategy, Policy & Transformation team, including providing regulatory research and financial analysis, budgets, tracking results to budgets, plus support for requests for proposals, business cases, and regulatory filings at the state and federal level.

Q. PLEASE SUMMARIZE YOUR WORK EXPERIENCE AND EDUCATIONAL BACKGROUND.

A. I graduated from State University of New York with a Bachelor of Science in Economics, and I earned a Master of Business Administration in Finance from Fairfield University. Prior to my current role, I have worked in various finance and planning roles at Avangrid Networks, supporting the operating companies, including NYSEG and RG&E, and previously with the United Illuminating Company.

Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE FERC?

A. No, I have not previously testified before FERC. I have testified before state commissions in Connecticut and Maine on both transmission and distribution rate making topics related primarily to expenses and rate base.

II. PURPOSE AND SCOPE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

- A. The purpose of this testimony is to describe the specific accounting processes and tracking mechanisms that the Applicants will use to implement the request in this proceeding for the recovery of 100% of its prudently incurred Construction Work In Progress (“CWIP”) in rate base (“CWIP Incentive”) for the Phase 2 Projects as explained in detail in this petition and the testimonies of James Yeske and Alan Trotta. Consistent with the Commission’s regulations and policies, these accounting processes and tracking mechanisms will prevent any double recovery of CWIP in rate base or as capitalized Allowance for Funds Used During Construction (“AFUDC”). The testimony also explains how abandoned plant costs (“Abandoned Plant Incentive”) would be recovered through the Applicants’ formula rate and the changes needed to the formula rate template to implement both rate incentives requested in this filing.

Q. ARE YOU SPONSORING ANY EXHIBITS IN SUPPORT OF YOUR TESTIMONY IN THIS CASE?

- A. Yes. Our testimony includes the following exhibits:

Exhibit 1: Clean NYSEG Formula rate template.

Exhibit 2: Redline NYSEG Formula rate template.

Exhibit 3: Clean RG&E Formula rate template.

Exhibit 4: Redline RG&E Formula rate template.

III. CWIP AND AFUDC

Q. PLEASE EXPLAIN THE NORMAL ACCOUNTING TREATMENT FOR ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION.

- A. AFUDC is a component of construction costs representing the cost of debt and equity funding used during the period of construction. The normal, or standard, method of

accounting for AFUDC is to apply AFUDC to a specific facility's construction costs, calculated using instructions in FERC's Uniform System of Accounts, 18 C.F.R. § 101. AFUDC is added to the cost of a related capital project and is reflected in rate base and appropriately depreciated when the related capital project is placed into service. This enables a utility to recover its cost of financing a capital project incurred during construction once the investment has been completed, becomes used and useful, and has been placed into service. Once a project is placed in service, the recording of AFUDC ceases. Under the standard AFUDC accounting methodology, the transmission investment, including the AFUDC balance capitalized during construction, is depreciated over the useful life of the underlying assets, and reflected in a utility's overall transmission revenue requirement.

Q. PLEASE EXPLAIN HOW THE APPLICANTS REQUESTED CWIP INCENTIVE, IF GRANTED, WILL CHANGE THE NORMAL ACCOUNTING TREATMENT FOR AFUDC BECAUSE CWIP IS ALLOWED IN RATE BASE.

- A. FERC's regulations, 18 C.F.R. § 35.25(e) and (f), require the discontinuance of AFUDC on those CWIP projects included in rate base and the implementation of accounting procedures to ensure that transmission customers are not charged for both the capitalized AFUDC and a return on the same CWIP included in rate base. If FERC allows the CWIP Incentive for the Phase 2 Projects, the Applicants will identify individually those transmission construction projects as eligible to be included in CWIP transmission rate base from the effective date established in the Commission's order in this proceeding ("Order"). Also, expenditures associated with those projects, once determined to be eligible CWIP balances for inclusion in rate base, will not accrue any AFUDC going forward.

Q. HOW WILL THE APPLICANTS ENSURE THERE IS NO DOUBLE RECOVERY OF AFUDC AND RETURN ON CWIP BALANCES?

A. The Applicants will use its SAP accounting system to maintain its accounting records for CWIP electric plant related to the Phase 2 Projects. Each transmission construction project is designated with a unique Work Breakdown Structure (“WBS”) project number within the Applicants’ SAP system. If FERC authorizes the CWIP Incentive for the Phase 2 Projects, from that date of approval forward, the projects eligible for inclusion of CWIP in rate base will be flagged in the Applicants’ SAP system as ineligible for AFUDC. The expenditures incurred during the construction phase, or remainder thereof, for the flagged projects will not accrue AFUDC from the effective date of the Order. After construction of a project is complete, the project will be placed into service by the CWIP balance being transferred to Plant in Service and book depreciation will begin. This tracking capability in SAP will prevent a double recovery of return on CWIP balances and capitalized AFUDC on the same rate base item, in accordance with FERC’s regulations. Note, the Phase 2 Projects have rate recovery through the Rate Schedule 19 of the New York Independent System Operator (“NYISO”) OATT as outlined in the Cost Sharing and Recovery Agreement.

The Applicants will continue to record AFUDC on any transmission project expenditures and CWIP amount incurred prior to the effective date of FERC’s Order authorizing the inclusion of 100% CWIP in rate base until the projects are completed and placed into service. When the project is placed into service, the CWIP balance, including an accumulated AFUDC balance, would be placed into service. Any capital expenditures invested after the approval date would have 100% CWIP in rate base treatment. If investment in a Phase 2 Project commences prior to CWIP incentive approval, the capital

expenditure amounts will be split into AFUDC eligible CWIP (pre-approval), and CWIP in rate base (post-approval) portions.

Q. PLEASE DESCRIBE TRANSPARENCY MEASURES TO SUPPORT THE CWIP INCENTIVE.

- A. For each Phase 2 Project, the Applicants will prepare monthly work order summaries of costs incurred under the associated WBS project numbers to show monthly additions to CWIP and to Plant in Service, corresponding to the amounts recorded in the Applicants' annual FERC Form No. 1.

The Applicants will use these summaries as data inputs in the Annual Update to Rate Schedule 19. The Applicants will make the work order summaries available upon request, in compliance with the review procedures in Rate Schedule 19 of the NYISO OATT.

IV. CWIP IN RATE BASE

Q. HOW WILL THE APPLICANTS ACCOUNT FOR 100% CWIP RECOVERY FOR THE PHASE 2 PROJECTS IN FERC'S UNIFORM SYSTEM OF ACCOUNTS?

- A. The Phase 2 Projects' expenditures will be accumulated in FERC Account 107, Construction Work in Progress, during the construction phase. Upon completion of construction and declaration of in-service status of a Phase 2 Project, the accumulated expenditures will be transferred to FERC Account 106, Completed Construction Not Classified, at which time book depreciation will begin. Upon unitization of the final costs related to the Phase 2 Project, costs will move from FERC Account 106 to FERC Account 101, Electric Plant in Service.

Q. DO THE APPLICANTS PROPOSE OTHER TRANSPARENCY MEASURES TO SUPPORT THE CWIP INCENTIVE?

- A. FERC requires applicants of the CWIP Incentive to make an annual filing with the Commission. The Applicants propose to satisfy this requirement through the annual filing of FERC-730, Report of Transmission Investment Activity, to the extent required. The annual FERC-730 requires the Applicants to provide information regarding transmission investment costs and project construction status, including estimated completion dates.

V. ABANDONED PLANT RECOVERY

Q. HOW WILL THE APPLICANTS RECOVER THE COSTS OF CANCELLED TRANSMISSION PLANT IN ITS FORMULA RATE?

- A. Before any costs related to the Abandoned Plant Recovery incentive are included in the Schedule 19 formula rate template, the Applicants will make a Section 205 filing seeking approval of the prudently incurred cancelled transmission plant costs and propose an amortization period for recovery. Once the dollar amount and amortization period are approved by FERC, the Applicants will include an amount in rate base equal to the cancelled transmission plant costs offset by the accumulated amortization. Also, consistent with recent decisions approving placeholders for incentives in formula rates, the Applicants will maintain a value of zero in its Schedule 19 formula rate template until they receive FERC approval to recover such costs.

VI. DESCRIPTION OF FORMULA RATE TEMPLATE MODIFICATIONS

Q. DO THE APPLICANTS' FORMULA RATE TEMPLATES NEED TO BE MODIFIED TO INCORPORATE THE CWIP INCENTIVE IN RATE BASE?

A. Yes. The modification to include CWIP in Rate Base can be seen in Appendix A, line 23, of the Formula Rate Template in Exhibits 1 and 3.

Q. DO THE TEMPLATES NEED TO BE MODIFIED TO INCORPORATE ABANDONED PLANT RECOVERY?

A. Yes. The Applicants propose revisions to its Formula Rate Template Exhibits 1 and 3 to allow for Abandoned Plant Recovery for authorized projects in Rate Base on Appendix A, line 24, titled "Abandoned Plant," as well as transmission depreciation expense on Appendix A, line 54, labeled "Amortization of Abandoned Plant." In the redline versions of Exhibits 2 and 4, font in red with a strikethrough denotes a deleted item while blue font indicates an addition.

Q. WHY ARE THESE MODIFICATIONS NEEDED TO ACCOMMODATE THE CWIP IN RATE BASE AND THE RECOVERY OF ABANDONED PLANT INCENTIVES?

A. On December 4, 2023, FERC issued its Order, 185 FERC ¶ 61,164, accepting NYSEG's Attachment 1 and RG&E's Attachment 2 to Rate Schedule 19 of the NYISO OATT, subject to further compliance, and suspended for a nominal period effective July 3, 2023, subject to refund, hearing, and settlement judge procedures on the proposed ceiling base return on equity values applicable to the Applicants' Phase 2 Project. The Order directed the Applicants to implement ministerial corrections and clarifications identified in the Applicants' responses in the proceeding and remove the CWIP and Abandoned Plant Incentives placeholders included in the respective formula rate template of each Applicant.

Q. DID THE APPLICANTS MAKE ANY MODIFICATIONS TO ITS PROTOCOLS TO ACCOMMODATE THESE CHANGES MADE TO FORMULA RATE TEMPLATE?

A. No. The existing protocols did not require any modifications.

Q. DO YOU PROPOSE ANY OTHER CHANGES TO THE FORMULA RATE TEMPLATE?

A. No.

Q. DOES THIS CONCLUDE YOUR TESTIMONY?

A. Yes, it does.

Utilizing FERC Form 1 Data

Actual for the 12 Months Ended 12/31/2021

New York State Electric and Gas Corporation
Appendix A: Annual Transmission Revenue Requirement for Schedule 19 Projects

General Note: References to pages in this transmission formula rate rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note			
A	All amounts shown are based on five quarter averages which are contained in footnotes to the FF1 (with the following exceptions: CWC in line 28 which is based upon one-eighth of O&M, Accumulated Deferred Income Taxes in line 24 which are a combination of beginning and end of year averages and proration amounts, and Excess Accumulated Deferred Income Taxes in line 25 which are beginning/ending year averages).		
B	The maximum accumulated deferred tax offset to rate base is calculated in accordance with the proration formula prescribed by IRS regulation section 1.167(l)-1(h)(6).		
C	Cash Working Capital for Schedule 19 Projects equals one-eighth (45 days) of O&M allocated to Schedule 19 Projects.		
D	Includes only FICA and unemployment taxes.		
E	Any transmission regulatory expenses allocated to Rate Schedule 19 Projects are determined after deducting any directly assigned regulatory expenses.		
F	Below are the currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). Any Excess or Deficient Deferred Income Taxes reduce or increase income tax expense by the amount of the expense multiplied by (1/1-T).		
	Inputs Required:	FIT =	0.00%
		SIT=	0.00% (State Income Tax Rate or Composite SIT)
		p =	0.00% (percent of federal income tax deductible for state purposes)
G	Include ATU for Year N with Projected ATRR for Year N+2		
H	Debt cost rate = long-term interest / long term debt. Preferred cost rate = preferred dividends / preferred outstanding. The ROE is determined by the New York Public Utilities Commission and capped by the ROE determined by FERC. The ROE Cap will be supported in the original filing and no change in ROE Cap may be made absent a filing with FERC.		
I	Includes revenue related to Schedule 19 Projects only, such as pole attachments, rentals and special use.		
J	Includes revenue related to Schedule 19 Projects only.		
K	The following acronyms are used for allocators: CP= common plant allocator (allocate common plant and common expenses to total electric) DA= DA=direct assignment (the item is direct assigned to Schedule 19 Projects) GP= gross plant allocator (allocated Schedule 19 Projects gross plant as % of electric and common plant) GPE= gross electric plant allocator (allocated Schedule 19 Projects gross plant as % of total electric gross plant) S19P= Schedule 19 Projects plant allocator (Schedule 19 Projects gross plant as % of total transmission gross plant) S19 W/S= Schedule 19 Projects wage and salary allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries) S19 W/ST Schedule 19 Projects wages and salary allocator for transmission (Schedule 19 Projects wages and salaries as a % of transmission wages and salaries) NA= not applicable (the item is not applicable to Schedule 19 Projects) TPE= transmission plant allocator (transmission plant as % of electric) T W/S= transmission wages and salaries as % of electric wages and salaries		
L	NYSEG will exclude items in Account 930.2 shown on FF1 page 335 that are greater than \$1 M and not directly or indirectly related to its transmission assets.		
M	NYSEG either will direct assign O&M expense that have been tracked for the Schedule 19 Projects or allocate transmission O&M to the Schedule 19 Projects, but not both.		
N	In accordance with the NYISO OATT, Section 14.1.5, the gross receipts tax included in Schedule 19 Projects ATRR is as follows: Total Gross receipt tax rate 0.0000% Revenue requirement - Estimate of Line 82 Gross Receipts Tax -		
O	For future use.

Instructions for Account 190:

- ADIT items related only to Schedule 19 Projects are directly assigned to Column D
- ADIT items related to Plant are included in Column E
- ADIT items related to Labor are included in Column F
- Deferred income taxes arise when items are included in taxable income in different periods than they are included in book income.
If the item giving rise to the ADIT is not included in the annual transmission revenue requirement ("ATRR"), the associated ADIT amount shall be excluded.

Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(l)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used.

New York State Electric and Gas Corporation
Workpaper 7: True-up Adjustment for Schedule 19 Projects
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.
The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- (i)

In accordance with its formula rate protocols, NYSEG shall recalculate its Annual Transmission Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies.
- (ii)

Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year
- (iii)

Multiply the ATRR Before Interest by $(1+i)^{24}$ months
- Where:

i =

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months)
The interest rates are initially estimated and then trued-up to actual

To the extent possible each input to the Formula Rate used to calculate the Actual ATRR will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1 by the application of clearly identified and supported information. If the reconciliation is provided through a workpaper included in the filed Formula Rate Template, the inputs to the workpaper must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the workpaper and input to the main body of the Formula Rate.

Line			Estimated Interest Rate	Actual Interest Rate	Interest Rate True-Up
1	A	ATRR based on actual costs included for the previous calendar year	0		
2	B	Revenues based upon the Projected ATRR for the previous calendar year and excluding any true-up adjustment	0		
3	C	Difference (A-B)	0	0	
4	D	Future Value Factor $(1+i)^{24}$	1.0000	1.0000	
5	E	True-up Adjustment (C*D)	0	0	0
6	F	Interest Rate True-up (Note 1)	0		

Where:
i = average interest rate as calculated below

Interest on Amount of Refunds or Surcharges			Estimated Monthly Interest Rate	Actual Monthly Interest Rate

Note 1: The above depreciation rates cannot change absent Commission authorization

New York State Electric and Gas Corporation
Workpaper 9: Prior Period Corrections
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.

Line No.	Description	Source	(a)	(b)
			Revenue Impact of Correction	Calendar Year Revenue Requirement
1	Filing Name and Date			
2	Original Revenue Requirement			0
3	Description of Correction 1			0
4	Description of Correction 2			0
5	Total Corrections	(Line 3 + Line 4)		0
6	Corrected Revenue Requirement	(Line 2 + Line 5)		0
7	Total Corrections	(Line 5)		0
8	Average Monthly FERC Refund Rate	Note A		0.00%
9	Number of Months of Interest	Note B		0
10	Interest on Correction	(Line 7 * Line 8 * Line 9)		0
11	Sum of Corrections Plus Interest	(Line 7 + Line 10)		0

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- C Corrected formula rate calculations will be provided to support any corrections.

New York State Electric and Gas Corporation

Appendix A: Annual Transmission Revenue Requirement for Schedule 19 Projects

General Note: References to pages in this transmission formula rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note	
A	All amounts shown are based on five quarter averages which are contained in footnotes to the FF1 (with the following exceptions: CWC in line 28 which is based upon one-eighth of O&M, Accumulated Deferred Income Taxes in line 24 which are a combination of beginning and end of year averages and proration amounts, and Excess Accumulated Deferred Income Taxes in line 25 which are beginning/ending year averages).
B	The maximum accumulated deferred tax offset to rate base is calculated in accordance with the proration formula prescribed by IRS regulation section 1.167(l)-1(h)(6).
C	Cash Working Capital for Schedule 19 Projects equals one-eighth (45 days) of O&M allocated to Schedule 19 Projects.
D	Includes only FICA and unemployment taxes.
E	Any transmission regulatory expenses allocated to Rate Schedule 19 Projects are determined after deducting any directly assigned regulatory expenses.
F	Below are the currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). Any Excess or Deficient Deferred Income Taxes reduce or increase income tax expense by the amount of the expense multiplied by (1/1-T). <div><div>Inputs Required:</div><div><div>FIT =</div><div>0.00%</div></div><div><div>SIT=</div><div>0.00% (State Income Tax Rate or Composite SIT)</div></div><div><div>p =</div><div>0.00% (percent of federal income tax deductible for state purposes)</div></div></div>
G	Include ATU for Year N with Projected ATRR for Year N+2
H	Debt cost rate = long-term interest / long term debt. Preferred cost rate = preferred dividends / preferred outstanding. The ROE is determined by the New York Public Utilities Commission and capped by the ROE determined by FERC. The ROE Cap will be supported in the original filing and no change in ROE Cap may be made absent a filing with FERC.
I	Includes revenue related to Schedule 19 Projects only, such as pole attachments, rentals and special use.
J	Includes revenue related to Schedule 19 Projects only.
K	The following acronyms are used for allocators: <div><div>CP= common plant allocator (allocate common plant and common expenses to total electric)</div><div>DA= DA=direct assignment (the item is direct assigned to Schedule 19 Projects)</div><div>GP= gross plant allocator (allocated Schedule 19 Projects gross plant as % of electric and common plant)</div><div>GPE= gross electric plant allocator (allocated Schedule 19 Projects gross plant as % of total electric gross plant)</div><div>S19P= Schedule 19 Projects plant allocator (Schedule 19 Projects gross plant as % of total transmission gross plant)</div><div>S19 W/S= Schedule 19 Projects wage and salary allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries)</div><div>S19 W/ST Schedule 19 Projects wages and salary allocator for transmission (Schedule 19 Projects wages and salaries as a % of transmission wages and salaries)</div><div>NA= not applicable (the item is not applicable to Schedule 19 Projects)</div><div>TPE= transmission plant allocator (transmission plant as % of electric)</div><div>T W/S= transmission wages and salaries as % of electric wages and salaries</div></div>
L	NYSEG will exclude items in Account 930.2 shown on FF1 page 335 that are greater than \$1 M and not directly or indirectly related to its transmission assets.
M	NYSEG either will direct assign O&M expense that have been tracked for the Schedule 19 Projects or allocate transmission O&M to the Schedule 19 Projects, but not both.
N	In accordance with the NYISO OATT, Section 14.1.5, the gross receipts tax included in Schedule 19 Projects ATRR is as follows: <div><div>Total</div><div><div>Gross receipt tax rate</div><div>0.0000%</div></div><div><div>Revenue requirement</div><div>-</div></div><div><div>Gross Receipts Tax</div><div>-</div></div></div> Estimate of Line 7982
O	For future use.

Instructions for Account 190:
1. ADIT items related only to Schedule 19 Projects are directly assigned to Column D
2. ADIT items related to Plant are included in Column E
3. ADIT items related to Labor are included in Column F
4. Deferred income taxes arise when items are included in taxable income in different periods than they are included in book income.
If the item giving rise to the ADIT is not included in the annual transmission revenue requirement ("ATRR"), the associated ADIT amount shall be excluded.

Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(l)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used.

New York State Electric and Gas Corporation
Workpaper 7: True-up Adjustment for Schedule 19 Projects
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.
The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- (i)

In accordance with its formula rate protocols, NYSEG shall recalculate its Annual Transmission Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies.
- (ii)

Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year
- (iii)

Multiply the ATRR Before Interest by $(1+i)^{24}$ months
- Where:

i =

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months)
The interest rates are initially estimated and then trued-up to actual

To the extent possible each input to the Formula Rate used to calculate the Actual ATRR will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1 by the application of clearly identified and supported information. If the reconciliation is provided through a workpaper included in the filed Formula Rate Template, the inputs to the workpaper must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the workpaper and input to the main body of the Formula Rate.

Line			Estimated Interest Rate	Actual Interest Rate	Interest Rate True-Up
1	A	ATRR based on actual costs included for the previous calendar year	0		
2	B	Revenues based upon the Projected ATRR for the previous calendar year and excluding any true-up adjustment	0		
3	C	Difference (A-B)	0	0	
4	D	Future Value Factor $(1+i)^{24}$	1.0000	1.0000	
5	E	True-up Adjustment (C*D)	0	0	0
6	F	Interest Rate True-up (Note 1)	0		

Where:
i = average interest rate as calculated below

Interest on Amount of Refunds or Surcharges			Estimated Monthly Interest Rate	Actual Monthly Interest Rate

Note 1: The above depreciation rates cannot change absent Commission authorization

New York State Electric and Gas Corporation
Workpaper 9: Prior Period Corrections
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.

Line No.	Description	Source	(a)	(b)
			Revenue Impact of Correction	Calendar Year Revenue Requirement
1	Filing Name and Date			
2	Original Revenue Requirement			0
3	Description of Correction 1			0
4	Description of Correction 2			0
5	Total Corrections	(Line 3 + Line 4)		0
6	Corrected Revenue Requirement	(Line 2 + Line 5)		0
7	Total Corrections	(Line 5)		0
8	Average Monthly FERC Refund Rate	Note A		0.00%
9	Number of Months of Interest	Note B		0
10	Interest on Correction	(Line 7 * Line 8 * Line 9)		0
11	Sum of Corrections Plus Interest	(Line 7 + Line 10)		0

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- C Corrected formula rate calculations will be provided to support any corrections.

Rochester Gas and Electric Corporation
Appendix A: Annual Transmission Revenue Requirement for Schedule 19 Projects

General Note: References to pages in this transmission formula rate rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note

A	All amounts shown are based on five quarter averages which are contained in footnotes to the FF1 (with the following exceptions: CWC in line 28 which is based upon one-eighth of O&M, Accumulated Deferred Income Taxes in line 24 which are a combination of beginning and end of year averages and proration amounts, and Excess Accumulated Deferred Income Taxes in line 25 which are beginning/ending year averages).			
B	The maximum accumulated deferred tax offset to rate base is calculated in accordance with the proration formula prescribed by IRS regulation section 1.167(l)-1(h)(6).			
C	Cash Working Capital for Schedule 19 Projects equals one-eighth (45 days) of O&M allocated to Schedule 19 Projects.			
D	Includes only FICA and unemployment taxes.			
E	Any transmission regulatory expenses allocated to Rate Schedule 19 Projects are determined after deducting any directly assigned regulatory expenses.			
F	Below are the currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). Any Excess or Deficient Deferred Income Taxes reduce or increase income tax expense by the amount of the expense multiplied by (1/1-T).			
	Inputs Required:	FIT =	0.00%	
		SIT=	0.00%	(State Income Tax Rate or Composite SIT)
		p =	0.00%	(percent of federal income tax deductible for state purposes)
G	Include ATU for Year N with Projected ATRR for Year N+2			
H	Debt cost rate = long-term interest / long term debt. Preferred cost rate = preferred dividends / preferred outstanding. The ROE is determined by the New York Public Utilities Commission and capped by the ROE determined by FERC. The ROE Cap will be supported in the original filing and no change in ROE Cap may be made absent a filing with FERC.			
I	Includes revenue related to Schedule 19 Projects only, such as pole attachments, rentals and special use.			
J	Includes revenue related to Schedule 19 Projects only.			
K	The following acronyms are used for allocators:			
	CP= common plant allocator (allocate common plant and common expenses to total electric)			
	DA= DA=direct assignment (the item is direct assigned to Schedule 19 Projects)			
	GP= gross plant allocator (allocated Schedule 19 Projects gross plant as % of electric and common plant)			
	GPE= gross electric plant allocator (allocated Schedule 19 Projects gross plant as % of total electric gross plant)			
	S19P= Schedule 19 Projects plant allocator (Schedule 19 Projects gross plant as % of total transmission gross plant)			
	S19 W/S= Schedule 19 Projects wage and salary allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries)			
	S19 W/ST Schedule 19 Projects wages and salary allocator for transmission (Schedule 19 Projects wages and salaries as a % of transmission wages and salaries)			
	NA= not applicable (the item is not applicable to Schedule 19 Projects)			
	TPE= transmission plant allocator (transmission plant as % of electric)			
	T W/S= transmission wages and salaries as % of electric wages and salaries			
L	Rochester Gas and Electric will exclude items in Account 930.2 shown on FF1 page 335 that are greater than \$1 M and not directly or indirectly related to its transmission assets.			
M	RG&E either will direct assign O&M expense that have been tracked for the Schedule 19 Projects or allocate transmission O&M to the Schedule 19 Projects, but not both.			
N	In accordance with the NYISO OATT, Section 14.1.5, the gross receipts tax included in Schedule 19 Projects ATRR is as follows:			
		Gross receipt tax rate	0.00000%	
		Revenue requirement	-	Estimate of Line 82
		Gross Receipts Tax	-	
O	For future use.

Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(l)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used.

Rochester Gas and Electric Corporation
Workpaper 7: True-up Adjustment for Schedule 19 Projects
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.
The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- (i)

In accordance with its formula rate protocols, RG&E shall recalculate its Annual Transmission Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies.
- (ii)

Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year
- (iii)

Multiply the ATRR Before Interest by (1+i)^24 months
- Where:

i =

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months)
The interest rates are initially estimated and then trued-up to actual

To the extent possible each input to the Formula Rate used to calculate the Actual ATRR will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1 by the application of clearly identified and supported information. If the reconciliation is provided through a workpaper included in the filed Formula Rate Template, the inputs to the workpaper must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the workpaper and input to the main body of the Formula Rate.

Line			Estimated Interest Rate	Actual Interest Rate	Interest Rate True-Up
1	A	ATRR based on actual costs included for the previous calendar year	0		
2	B	Revenues based upon the Projected ATRR for the previous calendar year and excluding any true-up adjustment	0		
3	C	Difference (A-B)	0	0	
4	D	Future Value Factor (1+i)^24	1.0000	1.0000	
5	E	True-up Adjustment (C*D)	0	0	0
6	F	Interest Rate True-up (Note 1)	0		

Where:
i = average interest rate as calculated below

Workpaper 9: Prior Period Corrections
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.

			(a)	(b)
			Revenue	Calendar Year
Line			Impact of	Revenue
No.	Description	Source	Correction	Requirement
1	Filing Name and Date			
2	Original Revenue Requirement			0
3	Description of Correction 1			0
4	Description of Correction 2			0
5	Total Corrections	(Line 3 + Line 4)		0
6	Corrected Revenue Requirement	(Line 2 + Line 5)		0
7	Total Corrections	(Line 5)		0
8	Average Monthly FERC Refund Rate	Note A		0.00%
9	Number of Months of Interest	Note B		0
10	Interest on Correction	(Line 7 * Line 8 * Line 9)		0
11	Sum of Corrections Plus Interest	(Line 7 + Line 10)		0

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- C Corrected formula rate calculations will be provided to support any corrections.

Rate Formula Template
Utilizing FERC Form 1 Data

Actual for the 12 Months Ended 12/31/2021

Rochester Gas and Electric Corporation
Appendix A: Annual Transmission Revenue Requirement for Schedule 19 Projects

General Note: References to pages in this transmission formula rate rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note	
A	All amounts shown are based on five quarter averages which are contained in footnotes to the FF1 (with the following exceptions: CWC in line 28 which is based upon one-eighth of O&M, Accumulated Deferred Income Taxes in line 24 which are a combination of beginning and end of year averages and proration amounts, and Excess Accumulated Deferred Income Taxes in line 25 which are beginning/ending year averages).
B	The maximum accumulated deferred tax offset to rate base is calculated in accordance with the proration formula prescribed by IRS regulation section 1.167(l)-1(h)(6).
C	Cash Working Capital for Schedule 19 Projects equals one-eighth (45 days) of O&M allocated to Schedule 19 Projects.
D	Includes only FICA and unemployment taxes.
E	Any transmission regulatory expenses allocated to Rate Schedule 19 Projects are determined after deducting any directly assigned regulatory expenses.

F	Below are the currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). Any Excess or Deficient Deferred Income Taxes reduce or increase income tax expense by the amount of the expense multiplied by (1/1-T).		
	Inputs Required:	FIT =	0.00%
		SIT=	0.00% (State Income Tax Rate or Composite SIT)
		p =	0.00% (percent of federal income tax deductible for state purposes)
G	Include ATU for Year N with Projected ATRR for Year N+2		
H	Debt cost rate = long-term interest / long term debt. Preferred cost rate = preferred dividends / preferred outstanding. The ROE is determined by the New York Public Utilities Commission and capped by the ROE determined by FERC. The ROE Cap will be supported in the original filing and no change in ROE Cap may be made absent a filing with FERC.		
I	Includes revenue related to Schedule 19 Projects only, such as pole attachments, rentals and special use.		
J	Includes revenue related to Schedule 19 Projects only.		
K	The following acronyms are used for allocators: CP= common plant allocator (allocate common plant and common expenses to total electric) DA= DA=direct assignment (the item is direct assigned to Schedule 19 Projects) GP= gross plant allocator (allocated Schedule 19 Projects gross plant as % of electric and common plant) GPE= gross electric plant allocator (allocated Schedule 19 Projects gross plant as % of total electric gross plant) S19P= Schedule 19 Projects plant allocator (Schedule 19 Projects gross plant as % of total transmission gross plant) S19 W/S= Schedule 19 Projects wage and salary allocator (Schedule 19 Projects wages and salaries as % of total electric wages and salaries) S19 W/ST Schedule 19 Projects wages and salary allocator for transmission (Schedule 19 Projects wages and salaries as a % of transmission wages and salaries) NA= not applicable (the item is not applicable to Schedule 19 Projects) TPE= transmission plant allocator (transmission plant as % of electric) T W/S= transmission wages and salaries as % of electric wages and salaries		
L	Rochester Gas and Electric will exclude items in Account 930.2 shown on FF1 page 335 that are greater than \$1 M and not directly or indirectly related to its transmission assets.		
M	RG&E either will direct assign O&M expense that have been tracked for the Schedule 19 Projects or allocate transmission O&M to the Schedule 19 Projects, but not both.		
N	In accordance with the NYISO OATT, Section 14.1.5, the gross receipts tax included in Schedule 19 Projects ATRR is as follows: Gross receipt tax rate 0.00000% Revenue requirement - Estimate of Line 79.82 Gross Receipts Tax -		
O	For future use.

- Instructions for Account 190:
- ADIT items related only to Schedule 19 Projects are directly assigned to Column D
 - ADIT items related to Plant are included in Column E
 - ADIT items related to Labor are included in Column F
 - Deferred income taxes arise when items are included in taxable income in different periods than they are included in book income.
If the item giving rise to the ADIT is not included in the annual transmission revenue requirement ("ATRR"), the associated ADIT amount shall be excluded.

Note A: The calculations of ADIT amounts resulting from liberalized depreciations are performed in accordance with the proration requirements of Treasury Regulation Section 1.167(l)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used.

Rochester Gas and Electric Corporation
Workpaper 7: True-up Adjustment for Schedule 19 Projects
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.
The Annual True-Up Adjustment ("ATU") component of the Formula Rate for each Year shall be determined as follows:

- (i)

In accordance with its formula rate protocols, RG&E shall recalculate its Annual Transmission Revenue Requirement ("ATRR") for the previous calendar year based on its actual costs as reflected in its Form No. 1 and its books and records for that calendar year, consistent with FERC accounting policies.
- (ii)

Determine the difference between the Actual ATRR as determined in paragraph (i) above, and actual revenues based upon the Projected ATRR for the previous calendar year
- (iii)

Multiply the ATRR Before Interest by (1+i)^24 months
- Where:

i =

Average of the monthly rates from the middle of the Rate Year for which the ATU is being calculated through the middle of the year in which the ATU is included in rates (24 months)
The interest rates are initially estimated and then trued-up to actual

To the extent possible each input to the Formula Rate used to calculate the Actual ATRR will be taken directly from the FERC Form No. 1 or will be reconcilable to the FERC Form 1 by the application of clearly identified and supported information. If the reconciliation is provided through a workpaper included in the filed Formula Rate Template, the inputs to the workpaper must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the workpaper and input to the main body of the Formula Rate.

Line			Estimated Interest Rate	Actual Interest Rate	Interest Rate True-Up
1	A	ATRR based on actual costs included for the previous calendar year	0		
2	B	Revenues based upon the Projected ATRR for the previous calendar year and excluding any true-up adjustment	0		
3	C	Difference (A-B)	0	0	
4	D	Future Value Factor (1+i)^24	1.0000	1.0000	
5	E	True-up Adjustment (C*D)	0	0	0
6	F	Interest Rate True-up (Note 1)	0		

Where:
i = average interest rate as calculated below

Interest on Amount of Refunds or Surcharges			Estimated Monthly Interest Rate	Actual Monthly Interest Rate
Month	Year			
7	July	Year 1	0.0000%	0.0000%
8	August	Year 1	0.0000%	0.0000%
9	September	Year 1	0.0000%	0.0000%

Rochester Gas and Electric Corporation
Workpaper 9: Prior Period Corrections
Actual for the 12 Months Ended 12/31/2021

Debit amounts are shown as positive and credit amounts are shown as negative.

			(a)	(b)
			Revenue	Calendar Year
Line			Impact of	
No.	Description	Source	Correction	Revenue Requirement
1	Filing Name and Date			
2	Original Revenue Requirement			0
3	Description of Correction 1			0
4	Description of Correction 2			0
5	Total Corrections	(Line 3 + Line 4)		0
6	Corrected Revenue Requirement	(Line 2 + Line 5)		0
7	Total Corrections	(Line 5)		0
8	Average Monthly FERC Refund Rate	Note A		0.00%
9	Number of Months of Interest	Note B		0
10	Interest on Correction	(Line 7 * Line 8 * Line 9)		0
11	Sum of Corrections Plus Interest	(Line 7 + Line 10)		0

Notes:

- A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the end of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- B The number of months in which interest is computed is from the middle of the rate year in which the correction is needed to the middle of the rate year where the correction is reflected in rates - the same as how interest on the Annual True-up Adjustment is computed.
- C Corrected formula rate calculations will be provided to support any corrections.
